Franchise opportunities available

★★★★★ "We continue to partner with Detech on successful projects. They provide drawings, tech support and pre-configured systems that work right out of the box. They handle design requirements and specialty items so we can focus on what we do best while they train us to gain experience and ability to become self-sufficient. Now we are one of the only EC's in the area capable of providing and servicing Fire Alarm Systems. Big time game changer!"
—C. Berger, Denver, Colorado

CREATING SAFE & SECURE ENVIRONMENTS - PROTECTING & CONNECTING SINCE 1982

EXPAND YOUR EC BUSINESS by **teaming with Detech!**

- Leverage Detech for NICET certified design & engineered construction drawings, enabling your firm to obtain Fire Alarm permits and build your brand.
- Rely on pre-configured / programmed / tested systems for custom “plug & play” solutions... we **Simplify the Complex!**
- Meet AHJ codes requiring NICET certified specialists.
- Initially use our certified techs for supervision / programming / check-out / start-up / commissioning / inspection-certification & AHJ acceptance testing...then only for design with options for supply & support.
- We train your team to become qualified so you can do your own projects and also become a resource to us as a local sub for our direct clients. While your team installs and helps commission our pre-configured systems, we conduct on-the-job training.

- Our NICET Level III/IV designers and technicians are qualified to sign-off for individuals we have personally supervised in the field, providing a path for EC personnel to gain verifiable experience required for NICET Level II candidates.
- DetechNet EC's gain the ability to build a base of recurring revenue and meet specs which require certified designers, references and factory reps.
- As consultants to facility owners, A&E's, AHJ's and GC's, we list EC's from the Detech EC network in our specs for retrofits, new construction, TI's and expansions. We also sub to DetechNet EC's for deficiency code corrections, upgrades, POTS-to-Radio change outs, service & inspections.
- **Log into our website to view calendar of projects, upload plans & specs for your projects, request proposals for Parts & Smarts packages and schedule design review or technical support.**
